Dear Scotland Elementary School Parents,

The Scotland Board of Education recently approved the purchase and installation of cameras on school buses for the 2014-2015 school year for improved safety and security. Once the cameras are fully installed and operational, students riding the busses will be informed by their bus driver. A notice will also go to parents. Installation is targeted to be completed by Monday, September 15, 2014.

The Scotland Board of Education purchased the cameras for use on Scotland Elementary School student bus runs, not for students attending Parish Hill High School. Please be aware, that at this time, there is no intention of using the cameras to monitor students attending Parish Hill.

Information on the use of cameras is in the SES student handbook. Scotland Elementary School parents will need to sign off that they are aware of the use of these cameras for safety, security and disciplinary purposes.

If you have any questions concerning this initiative, please contact us at your convenience.

Sincerely,

Dr. Richard E. Packman
Superintendent of Schools

Cathy Pinsonneault
Principal
